

MR - 400

MECCHANICAL ROOM

The MR -400 water system is ideal for direct connect to dental units and sterilization centers needs for a larger practice or clinic. It can direct feed high bottle counts, multiple instrument washers and large autoclave & sterilizer stacks. It's the perfect solution for future-proofing your growing practice.

Features:

- * Produces 3 water types:
 - o Mineral-free water for autoclave & sterilizer stacks
 - o Low-mineral water for instrument washer rinse cycle
 - o Non-corrosive Low-mineral ultraviolet disinfected water for dental unit direct connect.
- * Produces 400 gallons per day.*
- * Revolutionary design for easy install & service
- * Quick change sanitary filters make for the fastest change.
- * Includes:
 - o remote DI dispensing gun for direct fill of autoclave & sterilizer reservoirs
 - o chrome faucet for bottle fill
 - o 10-gallon storage tank

Advantages:

- * Eliminates frequent DI filter changes with extended life filtration.
- * Power-driven system eliminates water shortages, increases delivery pressure.
- * Exclusive 2 year warranty*

Benefits:

- * Designed for practices & clinics with 9+ dental units. Simultaneously handles high bottle counts, multiple instrument washers, large autoclave & sterilizer stacks.
- * Eliminates bottled water hassles
 - o trips to purchase
 - o storage area
 - o lifting of heavy bottles
 - o Staff injuries.
- * Powered design overcomes water pressure and temperature deficiencies.
- * Ideal for direct water delivery to dental units.
- * Optional:
 - o 28 gallon tank
 - o 32 gallon tank
 - o
